-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1711

Applicant's arguments filed 3-24-05 have been fully considered but they are not persuasive.

Rejection over DeVos is withdrawn in light of applicants' amendments and remarks, but is retained as art of interest for its disclosure of interesting materials in the art.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 54-103 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horn et al.(5,512,602).

Horn et al. disclose preparations of two-component polyurethane foam forming systems comprising a polyol component containing polyol, water, additional blowing gases, polymer dispersions mixed with said water and polyol, stabilizers reading on those and in amounts as claimed, activators, assistants, fire retardants, fillers, and additives and an isocyanate component containing polyisocyanates, wherein the materials are combined at NCO Indexes meeting those as claimed (see the abstract, column 2 line 28 – column 3 line 53, column 5 lines 40-56, column 8 line 63 et seq., columns 9, 10, and 11, and the examples, as well as, the entire document).

Horn et al. differs from applicants' claims in that water in the elevated amounts recited by applicants' claims is not particularly required. However, Horn et al. demonstrates employment of water in varied amounts for the purpose of controlling its imparted foaming effect, as well as, setting forth particularly indicated ranges of amount values in overlap with the ranges of values set forth by applicants' claims. Accordingly, it would have been obvious for one having ordinary skill in the art to have employed water within the teaching of Horn et al. in elevated amounts for the purpose of increasing its foaming effect in order to arrive at the products of applicants' claims with the expectation of success in the absence of a showing of new or unexpected results. Additionally, it has long been held that where the general conditions of the claims are disclosed in the prior art, discovering the optimal or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233; *In re Reese* 129 USPQ 402 . Similarly, it has been held that discovering the optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272,205 USPQ 215 (CCPA 1980)

Applicants' arguments and results have been considered, but demonstration of new or unexpected results commensurate in scope with the scope of their claims is not seen or demonstrated.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1711

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
